

Endurance goes on and on!

Radir are excited to announce the launch of additional models to the hugely successful Endurance range of Infra-Red Temperatures Sensors from Fluke Process Instruments (Raytek, Ircon and Datapaq).

These new non-contact pyrometers enhance the existing range with increased options of temperature, optical and spectral ranges that will include many more applications.

So, if you want to monitor the temperature of your process (or equipment), please let us know, we are confident that we can offer a cost effective solution to your needs.

Contact us as below, or email endurance@radir.com for more information.

Infra-Red Nose Day!

This year we are supporting "Red Nose Day" by asking for jokes to add to our Infra-Red Nose day joke book. Send us a joke, by emailing rednoseday@radir.com and we will send you a CD with the best compilations on it. For every contributor we will donate money to the Red Nose Day appeal. www.radir.com
