

AUTO PRO™

Portable Infrared Thermometer for Automotive Diagnostics

Noncontact Temperature Measurement

AutoPro - For the Automotive Technician.

Temperature variances can indicate common mechanical and electrical problems. Diagnose them faster, safer and easier with AutoPro™, the noncontact infrared thermometer specially designed for the automotive professional.

AutoPro features SmartSight™ - two lasers merge into a single laser point to indicate a 13 mm target, an ideal spot-size for small area measurements often required for auto diagnostics. AutoPro can read temperatures up to 535°C, and can accurately measure in low light conditions, illuminating the work area with a built-in LED flashlight. AutoPro also features an illustrated, step-by-step user manual with detailed instructions for many common automotive diagnostic procedures, including engine misfires, exhaust and emissions, cooling systems and heating and air conditioning systems.
