

Radir Update October 2020

During these uncertain times we hope you and your nearest and dearest are safe and well.

Non-Contact, Infra-Red Pyrometers means you can measure all of your product, all of the time, without touching it! (Social Distancing?)

We can supply, maintain, repair and calibrate almost any make and type of Infra-Red Pyrometer.

We wanted to update and keep you informed as to how we are working at Radir with the current Pandemic restrictions in force:

The business is open as normal - Monday to Thursday 9am to 5pm, Friday 9am to 4pm.

When in the office, our staff are working using recommended practises of sanitising, distancing and if necessary, wearing masks.

All deliveries are isolated upon receipt here, before they are opened and any work commences.

As you know, non-contact temperature measurement is what we are all about. We now have a new stainless steel air purge collar for the MI3, this could be very useful if you operate in a harsh environment, please let us know if this is of interest to you.
