

New Thermalert T4.0 Option

We are pleased to start the new year by announcing the release of the Flame special T4.0.

These specialist infrared sensors are set to a specific wavelength to allow them to be used for one of the following gas flames:

- Measurement of **CO2 Gas Flames**
- Measurement of **CO Gas Flames**
- Measurement of **NOx Gas Flames**

All models have an operation temperature range from 120°C to 1650° as well as an optical resolution D:S of 33:1.

If you would like more information, please get in touch.

Free Giveaway (HURRY)

We are giving away a free ambient temperature and humidity clock. The 1st 30 people to contact us with a noncontact temperature measurement application will get one. Hurry and email clock30@radir.com with your

details and details of your application to be one of the lucky people to receive one.

Please be aware that we do not sell these clocks and they are just a simple and fun gift.
