

We have spent the time since the last newsletter doing demonstrations, testing and talking to customers about the new ThermoView TV30. Have you got in touch to arrange a demo for your application yet?

Use the TV30 to visualise and control your industrial process. It helps you detect abnormalities and pinpoint problems quickly.

Just a quick reminder of some of the highlights below.

### Highlights:

- Stand-alone camera
- No PC or additional software required
- Reduced installation cost and space savings
- Avoid downtime or costly repairs
- Built to work in the harshest environments
- Measuring range -10 to 1300 °C

### SV600 Update

It has been officially announced that Fluke Process Instruments SV600 Fixed Acoustic Imager is now fully integrated with Boston Dynamics' Spot® robot.
