

# About Us

## **Company background Compliance, policy, documentation**

Radir Ltd was formed in 2004 from UK/ Ireland distribution of Raytek temperature measurement thermometers. Providing customer support with engineers with experience dating back to 1990's Managing Director Peter Clarke saw Raytek acquire Ircon Infra-red pyrometers soon after Raytek was acquired by Fluke Part of Danaher, who in turn expanded to become the Fortive Group. Fluke retained Raytek and Ircon brands, as part of Fluke Process instrumentation and to strengthen further the Thermometry (and also) acoustic imaging business added Datapaq specialist oven temperature profiling data logging systems.

Radir have the Raytek quality manual available for inspection, with all aspects of Fluke Process Instruments covered under ISO 9001 (Dekra) and where appropriate Norwich, Cambridge, Milon Keynes, Berlin and any related Fortive operation.

## **Heath and Safety**

All Fluke FPI processes operate with a focus to optimise Health and safety of the public, staff, customers and suppliers. Radir are happy to supply further details and to complete questionnaires as needed.

## **Sustainability and Environmental Policy**

A key policy to genuinely engorge environmental awareness and policy.

## **Anti Bribery and Anti-corruption**

Fortive (including FPI) are very committed to this and we undergo regular training (Presentation material available)

Slavery issues, equality and inclusivity. Further documentation is underway and all questions are welcome

We are committed to obeying all **anti-corruption** and anti-bribery laws in all countries where we operate. Read more about integrity and compliance at Fortive.
